NUTRITIONAL MANAGEMENT

**Launch Date: January 1<sup>st</sup>, 2010**

**WOUND CARE BOOT CAMP** was created to provide a virtual classroom where physicians, nurses and allied healthcare professionals can learn the basic principles and fundamentals of wound care. Students gain a broad overview of all aspects of management of the wound care patient, including wound healing physiology, wound assessment, classification and diagnosis, as well as the initial approach to the management of the major wound types. These lessons and skills are essential to novice wound care practitioners, but also provide an excellent review to the seasoned wound healing veteran. A world renowned expert faculty provides didactic lectures complemented by rich digital photos and video illustration of actual patient scenarios and case studies. This course provides an excellent portal for entering the exciting field of wound healing and ensures the basic knowledge and essential skills required for a successful career in wound care.
